1. Which clip better matches the description?

Compare what you hear with the description. Ignore differences in sound quality at this step. “About the same” can mean both match well or both match poorly.

A | B | About the same

2. Which clip has better sound quality?

You rated their description match about the same. Now compare clarity, unwanted noise or distortion, and musical coherence.

A | B | About the same

Now compare sound quality.
